

Dear SNUCMAA Committee,

Thank you so much for choosing me to be a recipient of this generous scholarship this year. It really means a lot to me that a group of medical alumni from such a prestigious school see potential in me to also become a great doctor, and support my endeavors to save lives and bring others back to health. I have never once doubted this career path for myself, and as I complete my last year as an undergraduate before entering medical school, I cannot wait to make my dream career as a doctor become a reality with each day. With this dream of my comes a daunting financial burden that is greatly alleviated by SNUCMAA's generosity, and for that I am extremely grateful. Thank you so very much for supporting me and my future patients as I serve those in my Korean community here in the United States as well as others living in poverty in developing countries around the world.

Best regards,
Emily Kim
