

October 7, 2019

Dear SNUCMAA-NA Scholarship Donors and Committee:

Thank you so much for awarding the 2019-2020 SNUCMAA-NA 김태웅 Scholarship to me. I am very honored to be one of two students to receive this scholarship. I graduated from Princeton University in 2017 as a molecular biology major and am currently a 2nd year medical student at New York Medical College. To pursue my medical degree, I had to take a large amount of loans. This scholarship will help relieve a large financial burden for both me and my family. It will help me focus more on my studies, as well as extracurricular activities that I enjoy. For example, I volunteer at my school's student-run clinic and plan events for our Internal Medicine Interest Group and Geriatrics & Palliative Care Interest Group. This scholarship will help provide more time and opportunities for me to engage in these activities. With all of your support, I am excited to become a physician and to devote my life to improving people's health and well-being.

Thank you again for supporting my medical education.

Sincerely,

Angela Y. Kim (김예지)
