Port Washington, NY 11050

Dear SNUCMMA,

I would like to express my deepest gratitude towards SNUCMMA for choosing me as one of the recipients for the 2019 Scholarship. My family had always struggled financially and did not have the means to contribute significantly in financing my post-secondary education. As a result, I had always sought help from generous scholarships and financial aid. The issue of cost became a much greater source of concern when I was applying to medical school, as school-sponsored aid was limited within graduate school education. Not only was tuition a burden, but our family would not have been able to afford even the housing costs and fees. Knowing their struggles, I could not have possibly asked for support from my parents and had planned to finance my education on my own. That put a significant debt burden on me, and I am so incredibly grateful for this scholarship and your generosity for helping to alleviate this burden. It provides me the means to support my daily subsistence needs, such as food, thus allowing me to focus on pursuing my education with less worry. Moreover, it allows me to freely explore my interests and participate in programs that might have monetary requirements for participation. Many of these opportunities would have been out of my reach without your help. Thank you so much again for your support in allowing me to pursue my medical education. I hope that I will be able to become a doctor that will be able to contribute to scholarships such as this in the future.

Sincerely,
