The Centennial History of Korean-American Physician in America (listed)

Chung, Edward K (SNU, 1957)

Considered one of the world's top cardiologists. Completed his medical residency and cardiology fellowship at Washington University School of Medicine and Barnes Hospital in St. Louis, MO, 1958-1964. Wrote 100 textbooks and guides in the field of cardiovascular disease and testing (32 were translated into 12 foreign languages), including Principles of Cardiac Arrhythmias,. Published 650 scientific articles and delivered numerous lectures worldwide. Devised diagnostic ECG criteria using computerized electrocardiography. Was Director of the Heart Station at Thomas Jefferson Univeristy Hospital in Philadelphia. Now Professor Emeritus in medicine and cardiology, is on the editorial boards of many cardiology journals, and Thomas Jefferson University has established the Edward K. Chung Distinguished Lectureship in Cardiovascular Diseases in recognition of his myriad accomplishments in the field.
